## DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last 1. Office action is persuasive and, therefore, the finality of that action is withdrawn.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 7-12, are rejected under 35 U.S.C. 102(e) as being anticipate by Thro et al. (US Patent Number 5,864,764).

Regarding Claim 7, Thro teaches a communication terminal apparatus for wireless communication with a selected base station of one of at least two communication systems, the communication terminal apparatus being logged on as ready to receive the selected base station the communication terminal apparatus comprising:

recognition means for recognizing one of the at least two communication systems the recognized communication system having the selected base station (col 8 lines 30-67, col 9 lines 1-12), and

control means configured to allocate a network address to the recognized communication system under which the communication terminal apparatus can currently be reached and communicating control information via the selected base station to a control network address stored in a memory (col 5 lines 50-67) of the communication apparatus (col 6 lines 57-67, col 7 lines 1-35);

wherein the network address communicated to the control network address stored in memory is used for assisting in handling a call intended for the communication terminal apparatus but directed to a communication system via which the communication terminal apparatus cannot be reached (col 7 lines 1-67, col 8 lines 1-30).

Regarding **claim 8**, Thro teaches a communication terminal apparatus for wireless communication with a selected base station of one of at least two communication systems, the communication terminal apparatus being logged on as ready to receive the selected base station, the communication terminal apparatus comprising:

recognition means for recognizing one of the at least two communication systems, the recognized communication system having the selected base station (col 8 lines 30-67, col 9 lines 1-12), and

control means configured to allocate a network address to the recognized communication system under which the communication terminal apparatus can currently be reached and communicating control information via the selected base station to a control network address stored in a memory of the communication apparatus (col 6 lines 57-67, col 7 lines 1-35), for influencing an activation/deactivation condition related to another communication system not having the selected base station (col 8 lines 17-30-67, col 8 lines 1-12); and

the network address communicated to the control network address stored in memory is used for assisting in handling a call intended for the communication terminal apparatus but directed to a communication system via which the communication terminal apparatus cannot be reached (col 7 lines 1-67, col 8 lines 1-30).

Regarding Claims 9-10, Thro teaches a communication terminal apparatus wherein the control information activates a call redirection relating to a subscriber address under which the communication terminal apparatus can be reached via another communication system not having the selected base station, given corresponding readiness to receive the another communication system by the communication terminal apparatus (col 11 lines 1-55).

Application/Control Number: 09/509,408 Page 5

Art Unit: 2617

Regarding Claim 11, Thro teaches a communication terminal apparatus wherein the

memory stores a control network address of a mobility server (col 3 lines 15-60).

Regarding Claim 12, Thro teaches a communication terminal apparatus wherein the

memory stores a plurality of control network addresses of a plurality of communication

systems (col 3 lines 3-67), and the communication terminal apparatus further

comprising:

selection means for selecting at least one control network address of another

communication system not having the selected base station (col 8 lines 30-67, col 9

lines 1-12).

Response to Arguments

3. Applicant's arguments with respect to claims 7-12 have been considered but are

moot in view of the new ground(s) of rejection.

The references made herein are done so for the convenience of the applicant. They are in no way meant to limit the reference. The

reference MUST be considered in its entirety.

Conclusion

4. Any responses to this action should be mailed to:

Art Unit: 2617

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Naghmeh Mehrpour whose telephone number is 571-272-7913. The examiner can normally be reached on 8:00-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha Banks-Harold be reached (571) 272-7905.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
